

Basic Digital Estimator License

GraphiTech's Digital Estimator is provided at an extremely low cost for the Basic Version which includes considerable capabilities.

The License Code Screen appears to the left and is offered as the basic version with a single check mark shown.

Simply click on the "Get Key Code" and a group of numbers will appear. Then call GraphiTech at 800-634-8324 and, if

you've already paid the license fee, you will be given the unlock password.

The Worksheet shown to the right illustrates how the Basic Digital Estimator appears.

Add-Ons to Digital Estimator License

When you're ready to enhance your Digital Estimator, simply access the License portion of the program (under the File Menu), and select the options desired.

For example, the most common options are Stocking, Reports and Bindery which will cost an additional \$300 to implement (\$475 Total).

But there are other options as well. You can click as many options as desired to see what the costs will be. In general, each option is \$100 except for the Network Enabled option, which is \$300. The Invoice Amount is your additional cost.

If you choose the network Option, you may install the program on as many computers as desired, place the database onto a common server, and then simply call GraphiTech for the final step to enable this option.
